Charging mode

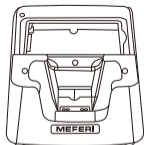

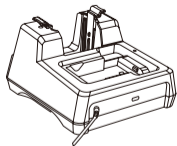

a) ME74 Charging:

Connect the 12V/2A charger to the DC interface located on the back of the single-slot cradle. Once connected, MEFERI logo light will turn on, Insert the ME74 device into the cradle slot, The ME74 will now enter the charging state. The status indicator light on the device will appear red while charging and turn green when fully charged.

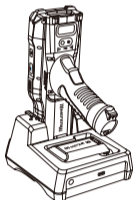

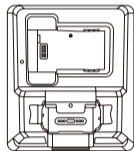

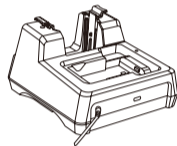

b) ME74 Charging With Protective Boot:

Connect the 12V/2A charger to the DC interface located on the back of the single-slot cradle. Once connected, MEFERI logo light will turn on. Then remove the plastic insert from the charging station slot to enlarge the compartment and insert ME74 with a Protective Boot into the cradle slot. The ME74 will now enter the charging state. The status indicator light on the device will appear red while charging and turn green when fully charged.

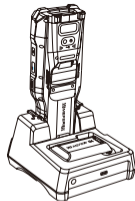

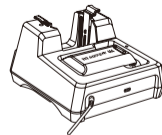

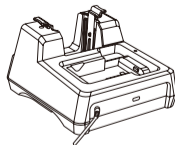

c) ME74 Charging With Pistol Grip:

Connect the 12V/2A charger to the DC interface located on the back of the single-slot cradle. Once connected, MEFERI logo light will turn on. Insert the ME74 with Pistol Grip into the cradle slot. The ME74 will now enter the charging state. The status indicator light on the device will appear red while charging and turn green when fully charged.

d) Battery Charging:

Connect the 12V/2A charger to the DC port located on the back of the Single Slot Cradle. Once connected, the MEFERI logo light on the cradle will turn on. Insert the battery into the add-on box on top of the Single Slot Cradle, making sure the battery and charger contact connectors are properly aligned, the indicator light near the battery will turn on, and the battery will now enter charging state. During the charging process, the indicator light will show red and turn green when the battery is fully charged. The battery can be charged independently or simultaneously with the ME74 device.

Communication mode

Connect the USB cable to the Type-C port on the back of the single-slot dock. Once connected, the MEFERI logo light on the dock will light up. Whether the ME74 is using accessories such as the Pistol Grip or rubber protective cover, simply plug it into the single-slot dock to charge and exchange data with the PC. In communication mode, the single-slot dock cannot charge the battery.
