

ME6X 4-Slot Battery Charger Quick Start Guide

Overview

Front

Back

Instruction Manual

Connect the 12V/4A power adapter to the DC port on the side of the 4-slot battery charger and install the battery by pushing the black button at the arrow upwards with your finger while pressing down on the battery that is inserted flat into the charger slot. The status LED next to the battery is red while the battery is charging and green when fully charged. To charge the battery, all slots can be used individually or simultaneously. When the battery is fully charged, lift it up by pinching the sides of the groove with your fingers and push the black button at the arrow upwards to remove it.
