

ME74 20-Slot Battery Charger Quick Start Guide

Front

Instruction manual

Firmly connect the power cable to the 24V/10A charger, connect the charger to the DC port on the side of the ME74 20-Slot Battery Charger, then insert the battery obliquely into the slot of the charger, and press down to complete the installation. When the battery is charging, the status indicator next to the battery is red, and green when fully charged. To charge the batteries, all slots can be used either individually or at the same time. When the battery is fully charged, pull up the latch next to the battery and the battery will pop up automatically. Use your fingers to take out the battery from the side of the groove.
