

Data T2 UHF High-performance RFID Terminal

Serve purposes of fast-growing business

iData T2 UHF is a 4G high-performanceRFID terminal with efficient RFID reading capability and 4G communication capability, which can meet the needs of rapid business growth of enterprises for equipment performance. It improves workers' efficiency and help enterprise to cope with future challenges confidently.

Efficient RFID reading, designed for business

The tag reading rate is faster than 700 tags/s, which can help workers save 40% of their time and complete their work faster when dealing with massive inventory work.

4G WWAN makes operations smoother

The device adopts 4G WWAN. After the worker completes the reading, the information can be uploaded to the system quickly, and the loading time can be shortened querying the information.

Dynamic duty cycle algorithm to optimize the efficiency

The dynamic duty cycle algorithm will regularly estimate the number of tags in the surrounding environment, dynamically adjust the running time of the RFID module, extend the battery life and lifespan of the module.
